

Introducing Typesy! It is Common Core, BEST, TEKS standards-aligned and offers grade-differentiated keyboarding, so your students will be learning while typing. Here's what you can expect.

1. Keyboard mastery lessons (asdf, jkl;) that are separate from practice texts. So, your students don't have to repeat them at the beginning of each year. Once they master the keyboard, they are ready to move on to practice texts.
2. Practice texts that are standards-aligned, and grade-differentiated. Each grade has 20-45 hours of texts to type.
3. Digital Citizenship, Office modules, a huge Vocabulary section and more.
4. An easy-to-use wizard that allows you to add your own custom texts, spelling words, vocabulary, and tests.
5. An AI immersive reader that reads practice texts to your students. It will also read out in Spanish and a plethora of other languages.
6. A *Using Typesy* module specifically for educators to learn how to best use Typesy. Online webinars and support are also included.

Typesy rosters with Google Classroom, Classlink, CSV file and more. It is compatible with Windows, Mac, Chromebooks, iPad, and Android. So, whether you are concerned about your students' ability to succeed at online testing or believe that keyboarding is a must-have skill, Typesy can help.

You can learn more at <https://www.typesy.com/explore>.

Scroll below the sign-up sheet and you'll see two short videos giving you a view of both the student and teacher experience.

Pricing for up to 10 to 50 student licenses is \$3.60 per student per year and drops when you purchase more licenses.

**To open a trial, get a quote or place an order, email me at [linda@techntype.com](mailto:linda@techntype.com) along with**

1. How many student licenses you need
2. How will you be rostering: ClassLink, Clever, CSV upload, Google Classroom
